1. INTRODUCTION

- 1.1. This document objective is to detail information related to liquid ring compressor packages of MARLIM REVITALIZATION project.
- 1.2. Design shall comply with rules and regulations stated by Brazilian Authorities, Classification Society and International Standards. PURCHASER and PACKAGER shall also comply with local codes / regulations and shall be responsible for their legal translations.
- 1.3. PURCHASER and PACKAGER shall comply with Contract exhibits. Requirements for capital spare, spare parts, field proven experience, training, commissioning support and Classification society, among other contractual requirements, shall be according to Contract exhibits.
- 1.4. This document will cover the compression package of the following system: UC-1223001 – SETTLING TANK GAS RECOVERY COMPRESSION UNIT.

2. DEFINITIONS

PETROBRAS	FPSO contracting and operating company.
PACKAGER	Company responsible for project, assembly, construction, fabrication, test of compressor and project, assembly, tests, integration and furnishing of all other main equipment in the skid, including the auxiliary systems.
PURCHASER	EPC company responsible for project, assembly, erection, construction, fabrication, test and furnishing, lift, hook up, installation and integration of all Modules of FPSO, with complete and fully operative systems in accordance with the requirements of this specification, codes and standards referenced therein.
VENDOR	Company hired by the purchaser or packager to supply equipment, components of equipment, instruments, control systems, etc. that will be part of the main system to be supplied.

3. GENERAL DESIGN REQUIREMENTS

- 3.1. Equipment shall be designed to meet PETROBRAS requirements and for unattended, fail-safe, continuous service as well as for idle periods up to several months in saline atmosphere (marine environment) on the FPSO. Prime importance is given to approve high degree of reliability, durability and maintainability.
- 3.2. PACKAGER shall be the compressor OEM (Original Equipment Manufacturer) and shall assume unit responsibility and shall assure that all subvendors comply with the requirements stated herein.
- 3.3. All operating points shown in the data sheet, as well as not shown operating points with lower flow rates or intermediate molecular weight, have equal probability of occurrence. There is no predominant operating point. The certified point does not represent the most frequent operating point.
- 3.4. The package (or parts thereof) installed in classified areas shall be provided in accordance with the requirements stated in ISO 80079-36 and ISO 80079-37. PACKAGER shall provide a certificate assuring that the equipment and components of the package are in conformity with the abovementioned standards, including as minimum:
 - a) Ignition Hazard Assessment Report as per ISO 80079-36;
 - b) Specific requirements for the design and construction of non-electrical and equipment type of protection as per ISO 80079-37;
 - c) Equipment nameplate including ISO 80079-36 marking requirements.
PACKAGER shall attest on his own responsibility that the equipment has been made in accordance with the applicable requirements of the relevant standards in safety matters.

	TECHNICAL SPECIFICATION	I-ET-3010.2Q-1223-320-P4X-101	REV.: A
	MARLIM LESTE E SUL		SHEET: 4 of 20
	TITLE: SETTLING TANK GAS RECOVERY COMPRESSOR PACKAGE SPECIFICATION (UC-1223001)		ESUP

4. UC-1223001 (SETTLING TANK GAS RECOVERY COMPRESSOR PACKAGE SPECIFICATION) – SPECIFIC REQUIREMENTS.

4.1. SETTLING TANK GAS RECOVERY COMPRESSOR PACKAGE SPECIFICATION (UC-1223001) shall be design and supplied as complete package, in compliance with the provisions of this document and its attachments, all applicable codes, standards, regulations and Classification Society requirements. It shall also comply with applicable Unified Interpretations and Unified Requirements issued by IACS – International Association of Classification Societies.

Complete package shall consist of a closed loop water system, including Liquid Ring compressors and drivers, Coolers, Filters, Vessels, Control panel, accessories, machinery protection system, oil system, etc. See details at I-FD-3010.2Q-1223-320-P4X-008 - SETTLING TANKS GAS RECOVERY COMPRESSION UNIT (UC-1223001) and I-FD-3010.2Q-1223-320-P4X-101 - SETTLING TANK GAS RECOVERY COMPRESSION UNIT. Additional process design cases shall be included as minimum in the I-FD-3010.2Q-1223-320-P4X-008 - SETTLING TANKS GAS RECOVERY COMPRESSION UNIT (UC-1223001):

d) 1 case for inert gas running test according to I-ET-3010.00-1200-320-P4X-001 - TECHNICAL SPECIFICATION FOR LIQUID RING COMPRESSOR;

4.2. Due to limited capacity of fresh water production by FPSO, PACKAGER and PURCHASER shall minimize fresh water consumption. See water consumption limit at I-FD-3010.2Q-1223-320-P4X-008 - SETTLING TANKS GAS RECOVERY COMPRESSION UNIT (UC-1223001). Utilities consumption shall be approved by PETROBRAS prior purchase.

4.3. System and utilities shall be designed in order to permit one or all two compressors in operation simultaneously. It means that spare unit shall be able to start and run before shutdown the other unit.

4.4. The Settling Tank Gas Recovery Compressor Package specification (UC-1223001), shall operate over wide ranges, usually within narrow suction pressure bands. The Settling tank gas recovery compressor C-UC-1223001A/B shall be equipped with compressor recycle valve. Suction pressure is maintained by pressure control of a recycle valve, with additional loading and unloading of the compressors when limits of valve opening/closing or suction pressure are reached. Usually, the controls are set up to sequentially load and unload the compressor.

5. I-ET-3010.00-1200-320-P4X-001 SPECIFIC PROJECT TERMS

5.1. For the current project, the following terms in left column of table below shall be understood as the text in right column of the same table. In I-ET-3010.00-1200-320-P4X-001 - TECHNICAL SPECIFICATION FOR LIQUID RING COMPRESSOR, the terms in left column shall be understood as right column in table below.:

IN I-ET-3010.00-1200-320-P4X-001:	SHALL BE READ AS:

6. PETROBRAS GENERAL DELIVERY REQUIREMENTS

- 6.1. Besides the Vendor Drawing and Data Requirements (VDDR) documentation listed in Annex “B” of API 681, which are required, VENDOR shall submit the documents described at Annex A of current technical specification. Different schedule may be proposed by VENDOR and submitted to PETROBRAS approval.
- 6.2. Proposal drawings and data shall not be certified or as-built.
- 6.3. PETROBRAS drawings approval shall not be understood as relieving the PURCHASER and PACKAGER from any responsibility for detailed design, dimensioning and construction of equipment or deviations from specifications.
- 6.4. All data, drawings and equipment supplied according to this specification shall use the SI measurement system, except for ordinary piping, flanges, accessories and appurtenances, which shall be in inches.
- 6.5. PURCHASER and PACKAGER shall provide weights, dimensions and center of gravity for all equipment, including auxiliaries in different skids or shipped loose, with accuracy of ± 10% in proposal phase and ± 3% after order. PURCHASER and PACKAGER shall also furnish required data for dry, operation, test and maintenance cases.
- 6.6. PURCHASER and PACKAGER are required to note on respective data sheets of main equipment the moments of inertia (kg.m²) of each rotor.

7. MINIMUM SCOPE OF SUPPLY

7.1. PURCHASER and PACKAGER shall be responsible for the design, development, engineering, coordination, procurement, fabrication, assembly and shall guarantee overall performance (fully functional and operable) of the whole package, including as a minimum:

- Liquid ring compressor
- Driver
 Electric Motor
 Diesel Engine
 Steam Turbine
- Gear (If applicable)
- Couplings and Guards
- Baseplate (Skid)
- Lubrication system, including:
 Constant Level Oiler
 Oil Mist provisions
- Seal system (seal, piping, accessories, etc.)
- Piping (auxiliary process fluid, steam, cooling water, lubrication oil, etc.)

- All the instruments and respective instrument supports
- Electrical and instrument installation (including cabling, cable termination details, motor terminal box details and grounding)
- Stainless steel (316) or non metallic material junction boxes mounted at skid edge
- Data books
- Installation, operation and maintenance manuals in Portuguese language (Brazil)
- All necessary information, requirements and documents for Settling Tank Design
- Utilities Consumption
- Supply & application of noise attenuation devices
- Ladders, platforms, handrails, guardrails, gratings where applicable
- Specification for bolts and nuts with indication of torque values on baseplate
- Instrumentation data shall be provided in a API standard datasheet
- Cables, cables trays, junction boxes and accessories within skid limits
- Motion requirements
- Spare parts for tests, NR-13 for tests (if applicable), commissioning, start-up and for one year assisted operation.
- Packing, coating, anticorrosive protection and preservation

7.2. For details about equipment and systems, see complete PETROBRAS specification I-ET-3010.00-1200-320-P4X-001 - TECHNICAL SPECIFICATION FOR LIQUID RING COMPRESSOR.

7.3. PURCHASER and PACKAGER are responsible for the complete package. Even if some sub-item is not described (for instance bolts, gaskets, expansion joints, thermowells etc.) PURCHASER and PACKAGER shall take it into account and include it in the scope of supply.

8. APPLICABLE DOCUMENTS (STANDARDS, REGULATIONS, ETC.):

8.1. The following referenced documents and standards are indispensable for the application of this document, including, but not limited to, the Rules of the Classification Society. For undated references, the latest edition at the date of contract signature applies, unless a specific date/edition is referenced in the contract or specified by the Classification Society rules:
